Kingston, April 26, 1843. 285-m
To the Editor of the Chronicis and Gazette.
Star—I have carefully examined, by various methods, the water from the Mineral Well at Mr. Megonite, been the Lake, a little to the East of Alwington House, and at the mutter is one of public interest now hage through your columns to communicate the results of the

analysis.

The deph of the bore, which reaches to the primi-tive rock, is 145 feet.

Uve rock, is 145 feet.

In the middle of last month, about 9 A. M., when the temperature of the air was 24° F. that of the water was 44°. the temperature of the air was 24 ° F, that of the water was 44 °.

Its appearance is somewhat pushing: Its radius about supleasantly allow its representation of the property in Lie mount to 117 52 grs. The strength of the start varies a little from time to time, (as that other with,) and of court owns fartly obtained with surface with a little from time to time, (as that other with,) and of court owns fartly obtained with surface with the start varies and the form to write a former part of the winter. I fight that the fluctuation is no great. The gassom smaller light representation is the great startly obtained with smaller portion than from the water lies a former part of the winter. I fight that the fluctuation is not great. The gassom smaller light-great. The Saline ingesticients, in an importal piols, are as follows:

Common Sali. 4861 Greiner.

Sulphate of Soda 21.36 °.

Chloride of Magnesium 13.42 °.

Chloride of Magnesium 13.43 °.

Chloride of Brigarians.

117-04
From this it will be seen that the water is a men because of the association, and the simple pairs as those composing pairs as those of Chelerham and Leanington. If a throughout its first that the composition of the common air. It rearnables Airthry Water/in Scotland in the grant in the strength will be the common air. It rearnables Airthry Water/in Scotland in the grant in the strength will be the common air. It rearnables Airthry Water/in Scotland in the Salphate from it, by the proportions of the Salma Commisser, the common statement with in Chelerham and Leanington and the strength of the streng 117 52
