BALLS

"ONEUPO" GOLF BALL Registered No. 228,555.

THE NEW SCOTCH GOLF BALL FOR 1901.

We have pleasure in drawing your attention to the **latest and best** of Golf Balls yet placed upon the market.

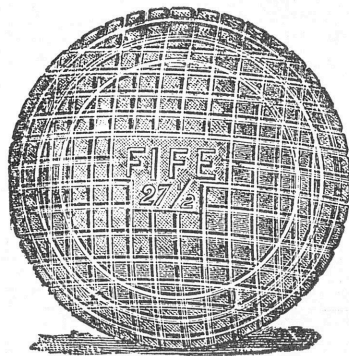

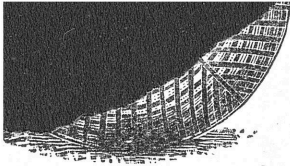

The "Oneupo" is most carefully made from specially selected material, and remakes to perfection, there being absolutely **no stickiness** as in the case of many brands of balls.

The "Oneupo" Golf Ball is the **most perfect** and **economical**, it has the highest possible degree of springiness, and leaves the driving club swiftly and easily, and flies a **longer distance** than any other ball.

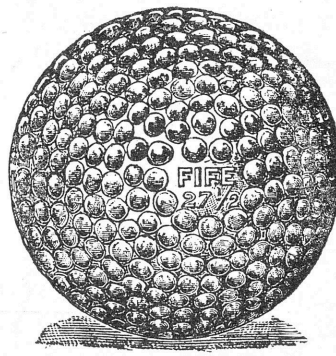

The "Oneupo" **floats in water**, an advantage which Golfers who have to play near water hazards will appreciate, and it is painted with a beautiful **snow-white paint**, which is **really unchipable**.

It is a **highest grade ball** at keenest possible price.

Golf Clubs

We are Sole Selling Agents for the Celebrated J. MacGregor Clubs.

We beg to inform the users of our Clubs that on January 1st, 1900, we changed the trade mark name, under which we have been selling our Golf Clubs, from "Willie Dunn" to "J. MacGregor."

When we began the manufacture of Golf Clubs we were unknown to the Golf Players, therefore, we thought it advisable to adopt the name of some professional, and made arrangements with Willie Dunn to use his name as a trade mark. On January 1st, last, we thought best to discontinue this, and substitute that of "J. MacGregor," THE REAL MAKER of the clubs.

In the future all of our Clubs will be stamped

BASE BALL MITTS

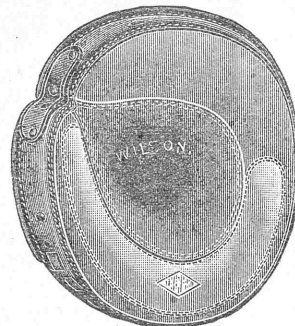

No. 99.—This Mitt is made of the finest quality of Mouse-colored Buckskin, stitched with the best linen thread, waxed, and stitched double to prevent it from ripping. Is padded with the best asbestos padding, which is far superior to the hair felt.

The fingers and thumb are thoroughly protected by a rubber guard which makes any serious contact with the ball impossible.

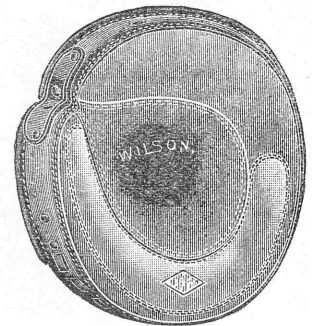

The thumb is also supported and a much better pocket is formed by our improvement, by which the thumb is laced to the hand

No. 99. Price \$5.00. Postage 30c. of the mitt by attaching the top of the thumb to the body of the mitt. This attachment with our patent lacing forms a deep pocket. The palm is reinforced, making a double palm mitt. This reinforcement covers the seam between the thumb and the hand of the mitt, which prevents all possibility of ripping where it is most likely to occur. The heel is raised, thus forming a pocket which surpasses everything on the market, and is ready for the player when the mitt is new, thus doing away with the "breaking in of the mitt." This mitt is extra large, measuring twelve inches across the hand, which is one inch larger than our professional mitt in past seasons.

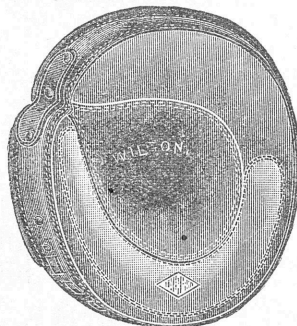

No. 90. Price \$5.00. Postage 30c.

No. 90.—This mitt is manufactured of the celebrated Asbestos Calfskin, which does not harden by wetting. It is sewed with the best quality of linen thread, waxed, padded with the best Asbestos Felt, and has patent laced thumb, with attachment and patent lacing for re-padding. The thumb and fingers are protected by a rubber guard, and the heel of the mitt is raised, forming a deep pocket.

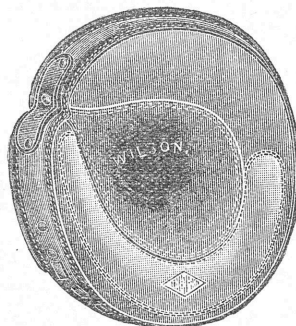

No. 98. \$4.00. Postage 30c.

No. 98.—This mitt is made of Mouse-colored Buckskin, in the same manner as No. 99, previously described, with the same improvements. Is same size as Regular Professional Mitt.

No. 114.—Men's Catchers' Mitt, made of genuine Drab Horse Hide Palms, Napa brown leather for backs and fingers. Has our patent laced thumb, also rubber guard protecting the fingers and thumb. It has raised heel, patent lacing for re-padding, and has a deep pocket. It is extra large, measuring twelve inches across the hand. The palm is reinforced with calfskin, making it double, and covering the seams between the thumb and the hand, preventing all possibility of ripping.

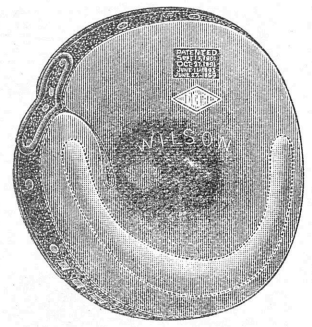

No. 102. \$3.00. Postage 25c.

No. 102.—This mitt is manufactured of Drab-colored horsehide, sewed with best quality of linen thread, waxed, and well padded. Has the patent laced thumb with attachment and patent lacing for re-padding. Has the rubber guard protecting the thumb and fingers, and has a good deep pocket. The palm is reinforced with calfskin, making it double, and covering the seams between the thumb and the hand, preventing all possibility of ripping. The palm is a little smaller than No. 114.

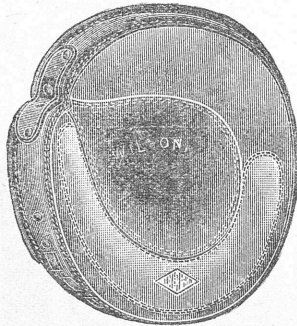

No. 100. Price \$2.00. Postage 25c.

No. 100.—This mitt is manufactured of good quality Drab-colored Horsehide, is sewed with the best quality linen thread, waxed, and has the patent laced thumb and attachment, patent lacing, and the improvement in the pocket like the professional mitt. The palm is reinforced with calfskin, making it double and covering seams between the thumb and the hand, preventing all possibility of ripping.

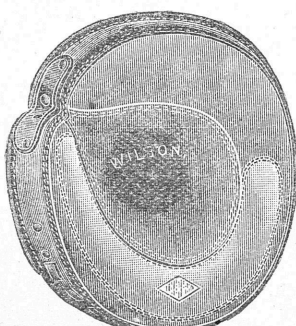

No. 92. Price \$1.50. Postage 20c.

No. 92.—Manufactured of Drab Horsehide Leather for the palms, and Gold Tan Leather for the fingers and back, and is made in men's extra large sizes. Has our patent laced thumb and attachment and patent lacing for re-padding. Also patent rubber guards protecting thumb and fingers. The seams between thumb and hand are covered with calfskin, preventing all ripping.

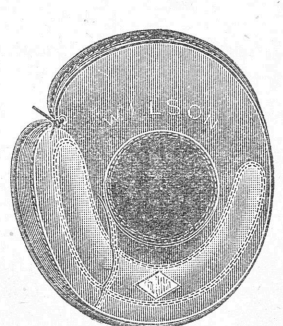

No. 113. Price \$1.00. Postage 20c.

No. 113.—Extra large size. This mitt is manufactured of Asbestos Calfskin Leather, which will not harden from wetting. It has a reinforcement, making a double palm, which extends over the seams between the thumb and the hand, preventing the seams from ripping. It has our patent laced thumb, with rubber guard protecting the fingers.

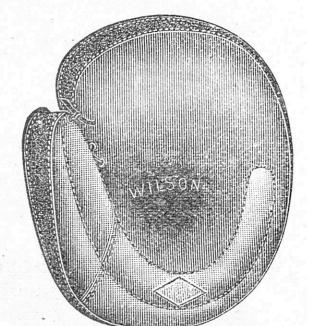

No. 106. Price 75c. Postage 15c.

No. 106.—Extra large size and manufactured of Asbestos Calf Leather. It has a reinforcement, making a double palm, extending over the seams between the thumb and the hand, preventing the seams from ripping. Has our patent laced thumb and raised heel, forming a deep pocket.

A Scientific Marvel. BLUE HILL BOX KITE The Wonder of the Age. NAVAL KITE:

Patented in Canada, August 4th, 1897.

The Blue Hill Box Kite is the invention of H. H. Clayton, Chief Observer at the Blue Hill Observatory, near Boston, and is used for sending up Recording Instruments in making Observations. Kites of this type have attained the height of two miles. It affords an endless amount of amusement to adults as well as children. Anyone can fly the Blue Hill Box Kite. It goes up straight from the hand like a bird. Will fly in a moderate breeze, and yet no wind short of a gale is too strong for it.

THE NAVAL BOX KITE.

Size folded, 34 x 14 inches, it folds, as shown above. Any child can set it up and fly it. This remarkable Kite can be flown singly or in groups of two, three, four or eight, as shown in following illustrations.

In order to get greater lifting surface, the "Naval Box Kites" may be tied together at the corners of each cell, in pairs, triplets, quadruplets or octuplets, as illustrated. In fact, any number may be lashed together and fly well, if the precaution is taken to have one strand of the bridle running to each kite.

THE WILSON NOISELESS STRIKING BAG PLATFORM

Our Platform is the Cheapest Adjustable One ever put on the Market.

Reasons why our platforms far surpass all others. The rings being made of iron they are absolutely noiseless and not earsplitting as are all wood rim platforms. There is no danger of the ring warping out of shape or falling apart as wood rings do.

Being put together with bolts, they are much easier to put up than others. The iron ring makes the bag at least 50 per cent. faster than wood rim platforms. All platforms that have a sliding adjustment are very noisy and not solid, and by using the bag the adjustment works itself loose. With our adjustment all this is overcome as you place the ring at the height desired. Price \$5.00, or complete with our No. 2 Bag, \$6.50.

THE BOYD FRAZIER NOISELESS STRIKING BAG PLATFORM

(PATENTED)

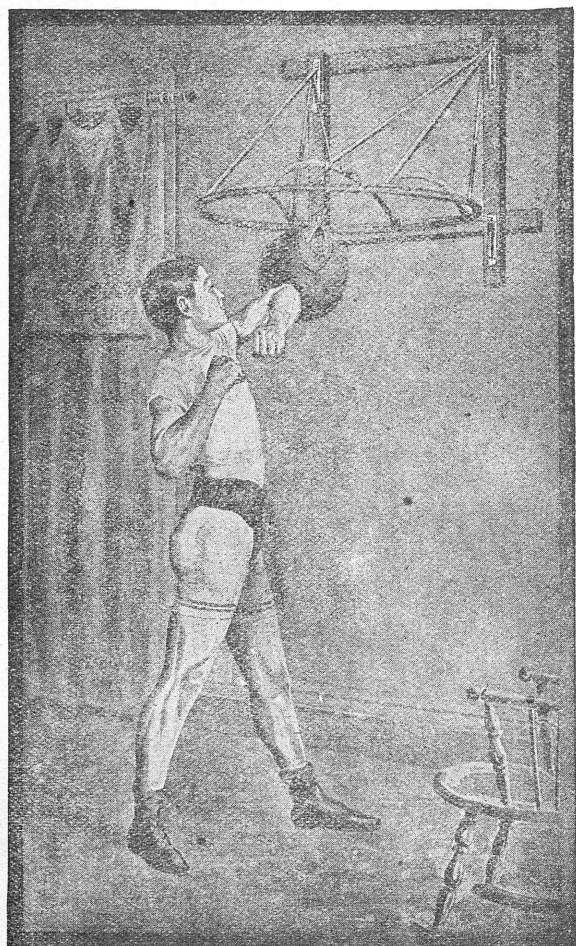

Endorsed by all Champion Fighters and Bag Punchers of the World.

Lightest, Fastest, Strongest and Best Punching Bag in the market. This platform is constructed entirely of iron and bolted together rigidly. It has no joints to wear loose and rattle and is very much stronger than other platforms of similar construction. Being made very light, it can readily be attached to the wall, and has practically no vibration. It does not obstruct the light, so it can be placed almost anywhere. As the striking surface of the ring is only one inch wide, there is scarcely any noise, and the strain being equally divided all over the bag, instead of one part, as is the case when used with other styles of platforms, the bag will wear evenly, instead of, as is usually the case, giving away in some one spot. The arch being raised above the striking point makes the bag travel much faster, which is very desirable, as one can get a large amount of light exercise in a short time, and it makes one quick with both hands and feet, also makes the eye very quick and accurate at judging distance, and offers a wide range of clever combinations and scientific work.

The swivel being of universal motion, the rope does not wear out, and as it is always on a straight line, the bag runs absolutely true. It is all very simple—only four screws in the wall and there you have the finest exercising apparatus and complete gymnasium in the world.

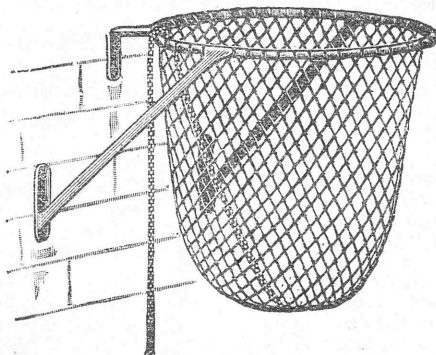

Width of platform, 36 in., which is equal to 48 in. old style platform; height, 24 in.; weight, 35 lbs.; weight crated for shipping, 45 lbs.

No. 1.—Complete (without bag), \$7.50; with our No. 2 Bag complete, \$9.00.

STANDARD FELT GYMNASIUM MATTRESSES.

The best mattress for general use in a gymnasium, is two inches thick, hair felt and canvas covered. This is thick enough to break the hardness of the floor, and yet firm enough to afford a good foot hold in jumping, wrestling, alighting from apparatus, etc. Where a greater degree of softness is required, this mattress may be doubled or made twice as thick. Still softer mats for Batteau board tumbling, etc., may be made of curled hair or Japanese hair. A liberal supply of mattresses should be provided in every gymnasium. They prevent many painful accidents, and are necessary in what are termed the "Lay Down Exercises."

THE LAFLIN FRICTION ROWING MACHINE.

The smallest, simplest and most practical Rowing Machine yet introduced. The means used to produce a resistance is a simple friction clutch, which takes instant hold at the commencement of the stroke and holds the pressure till its completion, but instantly releasing it, precisely as in a boat. It is quickly taken apart without loosening any bolts or screws, and can be set away in a closet or put under the bed, occupying but a small space—a most valuable feature for home use. Each machine is adjustable to any amount of friction and has an indicator so graduated that one revolution is equivalent to 100 strokes, or one-third of a mile, based on Hanlan's time of thirty-two strokes per minute. Handsomely built from ash and maple, iron work japanned, and every machine guaranteed. Price \$15.00.

WE MAKE BARS braced and guyed to the floor; BARS suspended from the ceiling; BARS placed under galleries; BARS braced from galleries; BARS of all kinds. Write us for Information and Estimates.

THE BUZZACOT COMPLETE CAMP COOKING OUTFIT.

It is simple and easy of manipulation and at the same time is complete as ingenuity and long experience can make it. For years attention has been devoted to the improvement of the outfit; every

article that could be profitably be dispensed with has been left out and many new features added, till to-day, as a result of constant development under the conditions of actual service the outfit is as near perfection as seems possible.

Description—The complete outfit includes everything necessary for any kind of cooking, as well as a complete mess kit, cups, plates, etc., for six persons. Price, \$5.00.

"ECLAT" HAMMOCKS.

In submitting our line of Hammocks for the season of 1901, we feel justified in claiming the handsomest, best and most complete line on the market.

To those not familiar with our line, we would state the whole line is called the "Eclat," designating our own style of spreader and method of finishing.

The additional name Ideal, Bon Ton, etc., indicates quality and style.

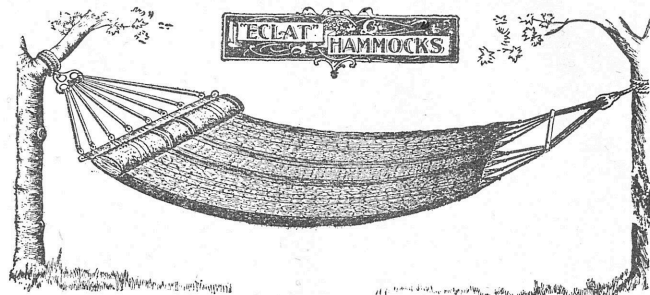

Ideal is our cheapest line guaranteed.

Bon ton is one of our lines of close woven goods representing a style and certain line of colorings. We can't do them justice in words, we want you to see them.

Perfection is a lower priced close woven hammock, guaranteed.

Zeinth, so called to emphasize or to distinguish the pillow.

It is of the same pattern as the hammock. Covers the whole width of the hammock. Is detachable. Is tufted and upholstered in a beautiful as well as first-class manner. We have no hesitancy in claiming for this hammock as a whole, to be the most comfortable, the most beautiful, the most complete and the strongest hammock on the market.

THE LLOYD WIRE HAMMOCK.

More durable than the cord Hammock.

Elastic and Comfortable.

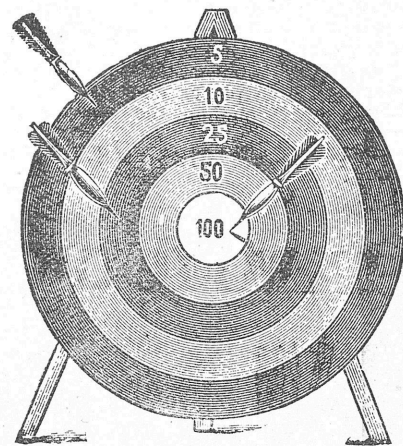

WILL NOT RUST.

Is made from galvanized steel wire, very closely woven, making an elastic and durable article for outdoor use. The end fittings are of malleable iron. These also are galvanized, and the Hammock throughout is moisture proof.

NEED NOT BE "TAKEN IN" AT NIGHT.

It can be left out in the weather throughout the season without injury. This point alone makes it far more desirable than the ordinary cord hammock, which must be "taken in" each night to insure its lasting even for a single season. Price..... \$3.50 each.

These Goods are sold Direct to the Consumer.

The Klondyke Veil, OR POCKET MOSQUITO BAR. A complete protection for any person whom flies bother, mosquitos bite or bees sting. Folds completely to be carried in the pocket. Price \$1.00, post paid to any address.

SHEPARD'S "BEVEL GEAR" CYCLOMETER.

Patented September 24th, 1897.

No. 1 is with this regular holder.

Striker.

No. 2 has also the detachable holder.

Using this detachable holder the cyclometer can be detached and carried in the pocket. Riders who have had their cyclometers broken off in transit on railroads will appreciate this.

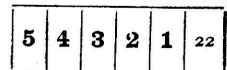

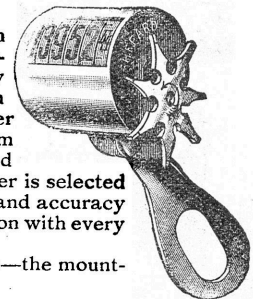

It is absolutely secure, and the cyclometer can be easily taken off or put on without changing adjustment in any way.

Has many points of superiority over any other cyclometer on the market. Smallest and most reliable cyclometer made. Warranted to run a million miles without repair or lubricant of any kind. The Shepard Cyclometers are made like a fine watch in finish, durability and accuracy. Only $\frac{1}{16}$ of an inch in diameter. Weight $1\frac{1}{4}$ ounces without the holder. Every part made from hardened brass and bronze, and nickel plated, making it rust and dust proof. Requires no lubricant. The plate over the register is selected cut glass. The inside gear mechanism is a marvel of simplicity and accuracy—not a spring in the entire construction. A positive geared motion with every revolution of the bicycle wheel. Every one warranted.

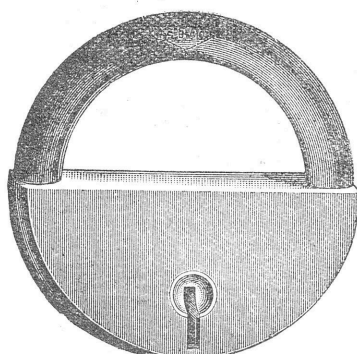

The Cyclometer is made to go on left hand side of the bicycle—the mounting and dismounting side.

The small figures over red lines on first roll register yards, 22, 24. The half lines between register feet—22 feet for each small space. The second roll with red figures registers tenths of a mile. Records to 10,000 miles, and repeats.

Shepard Cyclometer, with regular and detachable holder, regular price \$1.25, clearing at 75c. each.

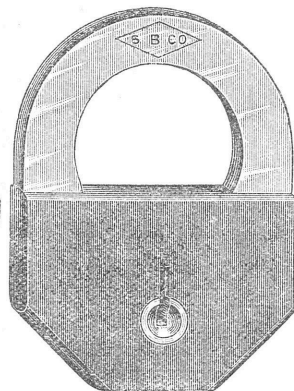

5432 $\frac{1}{10}$ miles, 22 yards.

THE PRACTICAL TYPEWRITER. No. 3.

A strong, handsome machine of steel, nickel plated. A key for each letter, feed roller, large and small letters. Easier to operate and less liable to get out of order than any other typewriter. Has a full line of characters. Prints clear and distinct. Correct alignment. Writing in sight; just as much so as though you were writing with a pen. Paper is quickly placed in position and line spacing is regulated by spring adjustment on roller feed. Writes full size letter paper. So simple that the novice can operate at once without teaching. No explanation or direction necessary. It explains itself. You will not have to hire an operator for this machine, but will write your letters yourself. You will also want a machine for your office boy. You will save money and add tone to your business. Price, \$5.00.

THE IMPROVED SIMPLEX TYPEWRITER.

The Improved Simplex is mounted on a reversible polished wood base which, when reversed, forms the cover of a handsome hardwood carrying case with nickel handle. For portability it has no rival, and yet it has the capacity of the most expensive typewriter. Prints capitals, small letters and punctuation marks, etc., and will take widest letter paper. A beautiful and useful holiday gift, suitable for either sex, and which can be kept in the drawer of your desk or can be carried abroad in your trunk or travelling valise. The work of this machine will compare favorably with that of any hundred dollar typewriter. Price, \$3.50.

PRACTICAL TYPEWRITER. No. 2.

A key for each letter. Perfect roller feed printing point in sight. Swinging carriageway for addressing packages. Practical. The paper passes through a feed roller and lays flat at the printing point directly in front. Each letter has its own key, which can be operated rapidly, and the writing appears in sight as fast as printed. To examine what has been written it is merely necessary to lift the carriage, and your whole letter is exposed to view. The Practical Typewriter is needed by every business man and office boy, to write letters and make out bills, and will be an important feature for correspondence and instruction at home and in schools. Price, \$1.50. By mail, 15c. extra.

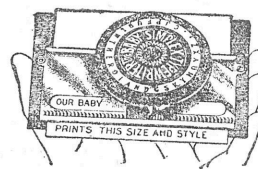

THE LITTLE GIANT.

Price, \$1.00, Postage 12 cents extra.

Is the same size, and prints same characters as Practical No. 2, but is without the metal frame and roller feed. The paper is moved up by hand, the straight edge of the metal base plate being used as a guide or rule to regulate the spacing between lines. Can be used to address envelopes, packages, mark maps, linen, etc.

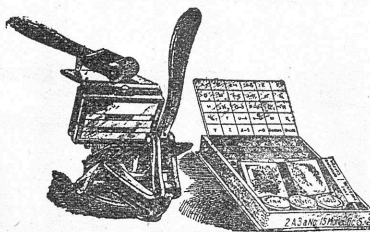

THE BABY SIMPLEX.

Price, 50 cents, Postage 10 cents extra.

Prints all capital letters, period and comma in neat little letters, and is miniature duplicate of Little Giant. It will write a postal card or neat little letter, and is a most instructive and interesting novelty.

GAMES.

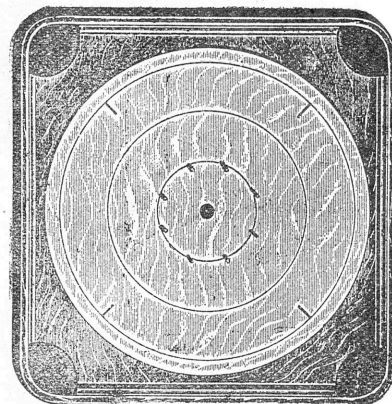

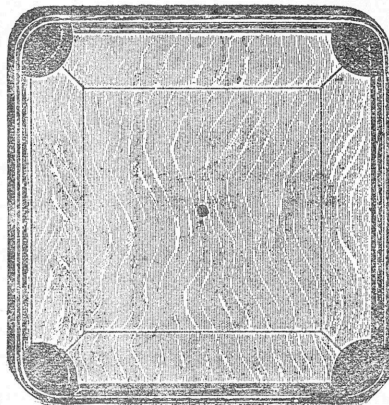

CARROMS.

Twenty-nine and one-half inches square with rounding corners. The centre is made from heavy three-ply veneer which is grooved into a hardwood frame, so it is impossible to warp. The playing surface is handsome bird's eye maple, highly polished with patent cushion sides which make the discs rebound very lively, so that an endless variety of shots can be made on it, such as cushion carrom or back shots. It has a pocket in each corner. Checkerboard on the back, which is handsomely finished. No parlor game has ever been put on the market which will compare with this board either in finish of the board or quality of the game. Price, \$2.25.

WILSON'S GAME OF DART.

Is one of the most interesting games ever placed upon the market. It offers an endless amount of amusement for all ages. Mounted in handsome style. Target complete with 6 darts. Price, \$1.00 each.

COMBINATION CARROMS AND CROKINOLE.

Combined Baby Jumper and Rocking Chair.

*Used as
Rocking Chair.*

*Used as
Reclining Chair.*

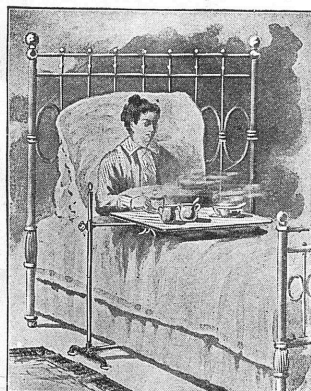

THE BABY'S TRUE FRIEND—Our Combined Baby Jumper and Rocking Chair fills a want recognized by all mothers and nurses, as it is safe, practical and convenient, and being handsomely constructed, is an ornament in the house. It is endorsed by physicians, because the up and down motion of the Jumper is healthful and invigorating, and in direct contrast to the side motion of the cradle, which authorities on such matters claim is detrimental to the mental and physical growth of the child. As each motion of the child is responded to by the Jumper, the child can be made to sleep more without the care of the mother or nurse. A child will sleep the whole night in a Jumper, when it will not sleep at all in a bed or cradle. This Jumper should be seen and tested by every mother, as it is the grandest thing ever invented for the baby.

Practically Indestructible—The Jumper is durable and strong, as it is made of quartered oak and the parts firmly connected; it is finely finished and is an attractive piece of furniture, that is creditable alike to the homes of the rich and the poor. The stand is neat and strong, and will support a weight of 100 pounds; it can be moved from place to place—on the porch, on the lawn, or anywhere in the house; is never in the way.

Advantages—This little invention consists of a chair with an adjustable back, so that the child can be placed in it in any desired position; its occupant can sit upright with a tray before it, or when tired can be laid down to sleep. The Jumper is hung by steel springs so that every motion of the child is responded to at once. When desired it can be taken down and used on as a rocking chair. As the child grows older the stand can be discarded and the Jumper used as a chair, and it is serviceable from birth until the child is ten years old.

Remove the Tray, spring the sides of the chair apart, and the tray will come out.

Made in three styles of finish, Black Enamel Trimming, \$4.50 each. Nickered trimmings, \$5.00.
Antique Bronzed Trimmings, \$5.50.

*A Dainty Meal, served daintily,
Whets the Appetite.*

Indispensable in the Sick Room.

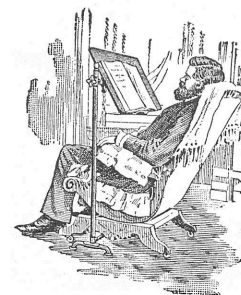

Combined Reading, Writing and Invalid's Table.

To assist nature, we must make the invalid as comfortable as possible.

Comfort in sickness is a most essential requisite to the recovery of those afflicted. In all the world there is nothing that brings more cheer, comfort and encouragement to the sick than our Combined Reading, Writing and Invalid's Table. This table is entirely independent of the bed and in no way rests upon it; therefore the patient does not suffer the least burden or interference, but is enabled to conveniently enjoy a meal or read with every comfort. The table leaf can be fastened in a level position or may be tilted either way and adjusted to any desired angle.

To have all the devices to make a perfect table, it must bear our label under each table top.

The Combined Reading, Writing and Invalid Table has a top made of quartered oak, very handsomely finished. It can be fastened on a level or any desired angle between a horizontal and perpendicular position. The upright and supports are made of bicycle tubing, screwed together in such a manner as to make the strongest possible support. The table weighs only 15 lbs., yet we have two casters on the legs so as to make it possible for a child to move it from place to place. Our table is the only one that can be folded "without unscrewing the parts" so that it can be put away in small space. The multiplicity of use and the small cost of the Combined Reading, Writing and Invalid's Table should appeal to every one. To be sure you are getting the best see that our label is underneath the top of each table.

Is appreciated after being used.

When through reading it is instantly made into a stand for holding the books and newspapers.

Is appreciated by the whole office force.

It holds the ledger, day-book, commercial record, atlas, papers, or anything that you wish to put on it.

Handsomely Finished in Black Enamel, Price \$5.00 Each.
